Emergency Medical Services Operational Efficiency Review

Fire Service is provided in Lake County by a combination of municipal fire departments, a fire department operated by a Community Development District (CDD), and a county fire department. There are a total of 13 fire departments consisting of both large and small departments, with most manned by full time firefighters. At least 10 of the departments either provide or are planning on providing Advanced Life Support (ALS) service utilizing a combination of paramedics and emergency medical technicians. Emergency transport is provided by a not-for-profit corporation currently owned by Lake and Sumter Counties (Lake Sumter EMS Inc. hereafter referred to as LSEMS) which provides ALS/ambulance services in both counties and which also provides medical direction and dispatching for all of the fire agencies in Lake County.

Sumter County has recently decided to withdraw from the not-for-profit corporation and provide ambulance services utilizing a private contractor with the stated purpose of realizing long term cost savings, improving response times and increasing accountability. The effective date of the Sumter withdrawal from the current structure is October 1, 2011. The Lake County Board of County Commissioners has tentatively decided to continue to operate a not-for-profit corporation to provide the most appropriate level of ALS/ambulance services in Lake County in partnership with the municipalities in the county. However, the Board of County Commissioners wishes to study the operation of the existing entity to assure that its structure and operations are providing a high level of service in an efficient manner and to avoid duplication of services between the not-for-profit, and county agencies and to

1. validate the decision to continue to operate ALS/ambulance services through the not for profit corporation, and
2. recommend operational, organizational, and administrative actions to be taken to ensure the maximum efficiency and effectiveness of the operation when it re-forms to a single county support structure.

The purpose of this solicitation is to acquire the services of a consultant (which could consist of one firm with subcontractors, or a joint venture between one or more entities) to examine the operations of the existing LSEMS, and to make recommendations to the Board of County Commissioners. The actual work plan and specific scope of services will be negotiated during the selection process. The consultant is expected to have expertise in accounting, efficiency studies, and the provision of fire, ALS, and ambulance services.

Specific areas that the Board of County Commissioners wishes to have studied are the following:

1. Review of the functions provided by LSEMS to determine if any are duplicative with other County resources or which could be provided more efficiently by a private contractor. At a minimum, the following functions should be reviewed: fleet maintenance, personnel, risk management, billing, building maintenance, training, non-emergency transport, dispatch services, medical direction, information technology, and

procurement. Currently finance and legal services are provided to LSEMS by county agencies.

2. Review of staffing and allocation of resources. The consultant shall evaluate the number of staff and ambulances that are necessary to provide service in Lake County, and shall include recommendations on shift scheduling, the number of ambulances needed, and where such ambulances should be located to include review of the leased facilities LSEMS uses and if anything could be relocated or located in county-owned or other government-owned facilities.
3. Staff compensation. Currently employees of LSEMS are not enrolled in the Florida Retirement System as are fire department employees of Lake County. In lieu of FRS membership LSEMS employees are provided an employer contribution to a defined contribution retirement plan. Scheduling for overtime purposes is different for Lake County Fire Employees than it is for LSEMS employees. Compensation and benefits for Lake County Fire employees and LSEMS employees are different. The consultant shall examine the entire compensation issue to determine whether equivalent positions in the County and LSEMS are receiving similar compensation when all benefits are included.
4. The consultant shall assess and make recommendations for improvement on the performance measurement system and customer satisfaction result measurement utilized by LSEMS.
5. The consultant shall conduct a thorough review of LSEMS operations and shall make such other recommendations as to efficiency, service improvement, and cost savings that the consultant can identify with a specific focus on the mission to be performed when the overall function re-focuses to a single county support role.

The following general guiding principles and objectives regarding preparation and completion of the study are provided as further general guidance regarding Board of County Commissioner expectations for the study:

A. The consultant should evaluate opportunities for consolidation and operational modifications to reduce budget costs and specify dollar savings per recommendations utilizing the issue development process of the Institute of Internal Auditors which involves the following statements: (1) Condition or Situation, (2) Cause of Issue, (3) Criteria used to Determine Issue Exists, (4) the Measurable Effect of the Current Condition, and (5) Recommendation.

B. The consultant should then develop recommendations regarding consolidation and operational modifications, including specific dollar savings, and discuss with LSEMS management. Determine extent that LSEMS management believes recommendation is feasible and will result in the savings as projected by the vendor including the time frame to implement. If agreement cannot be reached with management regarding feasibility, timing and projected savings, provide this information in the final report describing the consultant's position and that of LSMS management staff.

C. The consultant should plan to utilize:

- zero-based budgeting to evaluate functions and costs (to assure that "legacy" systems are identified, if applicable);
- a certified internal auditor from the Clerk's audit staff to provide internal information and assist with audit work;
- objective data to evaluate level of service issues, and identify operational changes that may impact level of service and the extent of such impacts (i.e. response times, staff turnover, staff qualifications, and related issues).

D. It is highly desired that the work plan will provide for receipt of an initial report and set of recommendations by September 1, 2011 that specifically addresses the immediate transition effort, and receipt of a final report by December 31, 2011 that addresses long term structure and considerations. The final report shall prioritize cost savings measures so that the BCC can select from choices, and provide an objective review of achievements as reported by LSEMS.
